
3.4 Upload Errors

3.4 upload error messages happen when the information on the document is missing or invalid. To prevent these errors from occurring, ensure the application is complete before generating the 3.4 file.

1. Manual Fix:

- a. **Open** 3.4 file with Notepad.
- b. **Click** Control + F on the keyboard.
- c. **Type** Keyword from the error message.
 - i. *(Example: State Code, Zip Code, etc.)*
- d. **Delete/Add** Missing or invalid information.
- e. **Save** File
- f. **Upload** To Octane.

2. For REO Subject Property Error:

- a. **Delete** Line 06G on the 3.4.
